LABEL - 398014-02 - Printed in Switzerland / Subject to change without notice.

Don't worry, no experience necessary...

...but you'll soon find the Elna 8200 Xperience is necessary. This embroidery-only machine is up to any task – in any style, in any room, on any fabric. Top designer studio fashions are now yours for the making in practically no time for just a fraction of the cost. It's simply a matter of touching a few keys and letting the machine go to work. You'll be so impressed with your embroidery results that you won't know where to stop!

Oops, design not where it should be?

Just mark the centerlines, hoop your fabric and use the hoop positioning keys to precisely align the needle above the centerlines. Your design will be embroidered exactly where you want it.

Love the flower but not the leaves or stem?

Just touch the screen to skip over the colors or parts you don't want.

There's no question

Everyone will know it's yours when you embroider your two letter or three letter monogram on it. Make it a little more unique by adding one of the four frame styles.

How much longer will it take?

You'll always know how much embroidery time remains. The screen shows a countdown in minutes.

Choices, choices and more choices

Whether it's Gothic, Script or Cheltenham, small, medium or large, when it's time to embroider alphabets, use either a single thread color or touch the color change key to embroider each letter in a different color.

Works first time, every time

When it's time to change the thread color, pull down the lever and the needle eye is threaded.

See it all take shape in just one hooping

Now you can bring in several designs, add letters and manipulate them all as you wish before embroidering a single stitch. Love the embroidery results? Save it for the future in one of the built-in memories or on an optional card.
